DataCare

Your needs, your success

*Professional
information
management at
your service*

DataCare is an information management solution to match the needs of your business.

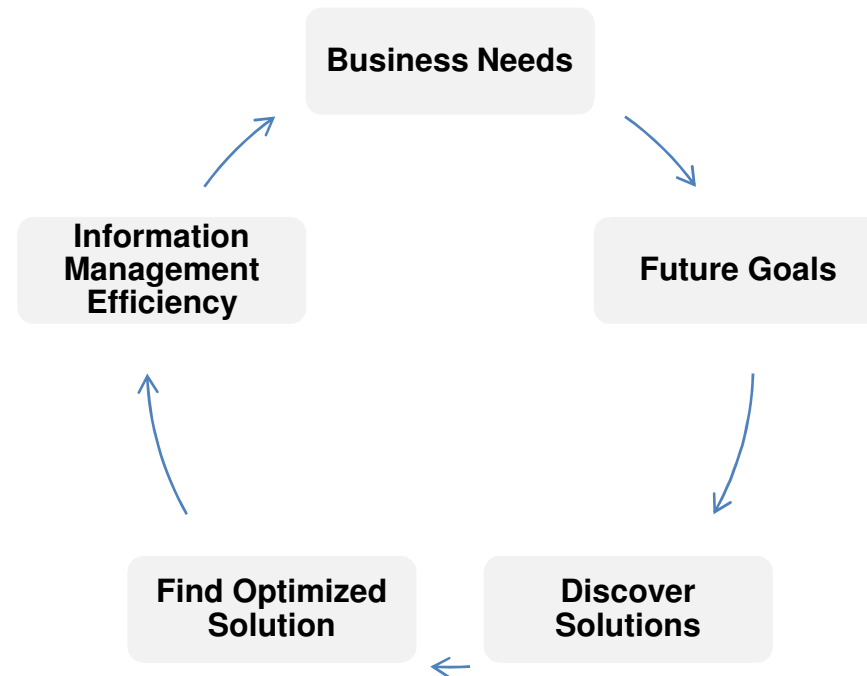

DataCare-specialists will assist you in finding the different possibilities of improving the cost-effectiveness of your current information management or of other ICT-solutions. We have competence of information management both in large-scale industry as well as in small business.

By uniting the individual demands of your business with the knowhow of Energetic Finland and of its partners, you will achieve the best possible result.

Your company is a professional in its own field. We are experts in information management. Strengthen your know-how with our strong expertise.

The provided service is determined solely by your company's needs. It can consist of consulting, information management systems or networking with a reliable specialist.
